SUMMARY

Over 3 years of experience in software development, specializing in building scalable, high-performance web applications using JavaScript and its modern frameworks. Skilled in developing both frontend and backend solutions with expertise in Angular, React.js, Next.js, Node.js, and Express, along with strong proficiency in HTML and CSS for crafting responsive, user-friendly interfaces. Experienced in integrating APIs, managing application state using Redux, and delivering elegant UI/UX designs that enhance usability. Adept at collaborating with cross-functional teams, optimizing application performance, and ensuring secure, maintainable code to meet business goals.

TECHNOLOGIES

- **Framework** :   React JS, Next JS, Material UI, Webpack, Redux, Javascript top framework
- **Standard** : Git, Ajax
- **Other** : JavaScript Development Tools, browser Apis, JavaScript in browser, Web communication protocols
- **Computer Language**: HTML, CSS/SCSS, JavaScript, React JS, Next JS, Typescript, Node js, Mongo
- **Platform**: Amazon web services, npm

PROFESSIONAL EXPERIENCE

Gni Soft Solutions LLP
August 2024 - Current

Crypto Exchange App

In the development of the crypto exchange application, I worked on the Next.js framework to build a high-performance, scalable platform. I integrated essential APIs to enable secure and seamless real-time cryptocurrency transactions. For efficient state management, I implemented Redux, ensuring smooth data flow and consistent user experiences across the application. Alongside the technical implementation, I designed an elegant and intuitive user interface, combining functionality with aesthetics to deliver a professional and user-friendly trading environment.

Eoxys IT Solutions LLP
Sep 2023 - July 2024

Worked on a Draftbit Clone, in which you can build native mobile apps, responsive web apps, and internal tools visually and collaboratively. Source code included, so you're never locked-in. in this project my role is as senior react js developer, and in this application we are using react redux Thunk for state management and using diifferent types of npm packages such as react router dom, material ui, redux, redux toolkit, scss etc.

E-Comm app

Worked on E-Comm application, my role in this company to create frontend of this application using react JS. in this application we are using react redux toolkit for state management and using diifferent types of npm packages such as react router dom, material ui, redux, redux toolkit, scss etc.

Gni Soft Solutions LLP **2022 - 2023**

Exchange app

Worked on multiple blockchain applications, my role in this company to create a dashboard of blockchain exchange applications using react JS. in this application we are using react redux toolkit for state management and using diiferent types of npm packages such as react router dom, material ui, redux, redux toolkit, scss etc.

Codeless Api Testing

Worked on a codeless api testing application just like POSTMAN, My role in this company as a react developer working on frontend of this application. in this application we are using react redux toolkit for state management and using diiferent types of npm packages such as react router dom, material ui, redux, redux toolkit, scss etc.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science **2018- 2021**

DAV College Abohar
